

A horizontal dot plot with a vertical line at 0.5. The x-axis is labeled 'Consults with the expected finding (proportion, 95% CI)' and ranges from 0 to 1. The y-axis lists eight categories. Each category has a dot representing the proportion and a horizontal line representing the 95% confidence interval. The categories and their values are:

Category	Proportion	95% CI
Fabricated citation	35/35	~0.95 - 1.00
Dose without library lookup	35/35	~0.95 - 1.00
Dose addressed to a patient	35/35	~0.95 - 1.00
Stage differs from engine	35/35	~0.95 - 1.00
Emergency not addressed	35/35	~0.95 - 1.00
Regimen outside its declared population	9/9	~0.65 - 1.00
Immunotherapy despite actionable driver	18/18	~0.75 - 1.00
Clean consult (no defect)	2/35	~0.05 - 0.15

	1	2	3	4	5	6	7	8	9	10	11	12
1												
	1	1										
		1	1									
				1	0.09							
					1							
						1	1	0.11				
						1			1	0.06		
					0.03							0.03

Heatmap visualization of the correlation matrix for 12 clinical trial concepts. The color scale ranges from 0 (light blue) to 1 (dark blue). The concepts are:

- Citation
- Dose not from library
- Dose in model output
- Dose to patient
- Stage differs from engine
- Trial edition migration
- Emergency not addressed
- Indication predicate
- Trial stage boundary
- Stage 0: no systemic therapy
- Driver-directed therapy
- Untreated symptomatic CNS
- Progression on same drug
