

a

Case: stage IVB, third line

62-year-old man, 40 pack-years, ECOG 1
Right upper lobe mass invading the mediastinal pleura;
multistation mediastinal nodes; left adrenal, multiple
bone and a single brain metastasis; adenocarcinoma
KRAS G12C; EGFR, ALK, ROS1, RET, MET exon 14 and
BRAF V600E negative; PD-L1 TPS 80%
Line 1 pembrolizumab–pemetrexed–carboplatin: mixed
response, new liver metastases; brain lesion after SRS
Re-biopsy PD-L1 10%; ctDNA: KRAS G12C up, MET amplified
Line 2 KRAS G12C inhibitor: primary and pleura progress,
malignant pleural effusion
Question: which next step?

b

c

Draft consult (round 1)

Stage IVB · NSCL-26 · palliative
1. Docetaxel + ramucirumab (REVEL)
2. Docetaxel monotherapy
3. KRAS G12C inhibitor + MET
inhibitor (KRYSTAL-MET-7)

Doses quoted from memory;
a trial that does not exist

submit

In-loop hook findings (2)

Unverified citation (warn; citation provenance)

These references were neither returned by a tool in this consult nor found in the trial registry or guideline KB: KRYSTAL-MET-7 — verify them with search_trials / citation_verify, or remove them.

Dose not from library (warn; dose provenance)

The answer contains dose figures, but regimen_dosing was not called in this consult to check the library reference dose; verify or remove the specific doses.

revise

Revised consult (round 2)

Stage IVB · NSCL-26 · palliative
1. Docetaxel + ramucirumab (REVEL)
2. Docetaxel monotherapy
3. Clinical trial (MET-directed combination)

Doses deferred to the library and
the local protocol
Responses: 2 findings accepted
Hooks on resubmission: none

d

Decision	Model (revised consult)	Kernel's independent reading (after the consult)	
Stage group	IVB (cT4N3M1c)	Staging engine: IVB (cT4N3M1c)	● Agrees
M category	M1c; M1c2 by sites (rationale)	Sites on record: M1c2 (6 sites, incl. brain)	● Agrees (M1c family)
Biomarker category	NSCL-26	Classifier: NSCL-26; untested: NTRK1/2/3, ERBB2, NRG1	● Agrees
Treatment intent	Palliative	Governed pipeline: palliative	● Agrees
Regimens	Docetaxel–ramucirumab; docetaxel	Governed: same; 6 of 40 library regimens eligible	● Agrees
Before dosing	Blood count, liver function, bleeding	Organ gates still open: bleeding-risk screen, blood count, liver function	● For the clinician
Audit findings	—	Draft: DOSE_IN_MODEL_OUTPUT; revision: none	● Clean
